Summary

Junior Web Developer proficient in mobile and desktop development with extensive knowledge of computing infrastructures. Always motivated to improve my skills through hands-on learning and development work. Not afraid of diving into legacy code and big projects. Fast learner, and well-organized. A team player with strong communication and analytical abilities.

Education

2021 - 2023

Full Stack Development College of INT – Graduated with honors.

2017 - 2021

B.ed: Physical education - Wingate College – Graduated with honors

2013 - 2017

Developmental courses while in military service:

- Designing and implementing a server infrastructure (John Bryce College)
- Designing storage infrastructure (NetApp)

Professional Experience

2022 - Current

Lecturer | INT college - Institute of Innovation & Technology

- Teaching Full Stack Development courses.
- Used variety of learning modalities and support materials to facilitate learning process and accentuate presentations.
- Evaluated and revised lesson plans and course content to achieve student-centred learning.
- Created self-use End to End systems with React.js, MongoDB, Redux Express, React Native, mySQL, and more.
- Troubleshooting and code-reviewing students' projects, while teaching UI-UX oriented programing.

2020 - 2022

Physical Education teacher | Makif H. Darka

Military Service

2013 - 2017

Administrator technician and Senior Storage Specialist

- Service in the Pikud-Merkaz Data center as an administrator responsible for 15 soldiers and acting as the commander in his absence
- Storage Specialist responsible for about 20,000 end users and about 150 servers
- Providing a professional response to faults in various infrastructural fields.
- Upgrading and rewiring of the command storage array
- Developed and modified programs to meet inner-team requirements.
- Completed quality reviews for designs, codes, test plans and documentation methods

Projects

2022 - 2023

Developed end to end web app for SugarBit (Letter will be provided upon request)

- Created an MVP of the requested app, while working with the designers
- Collaborated with other team members
- Created the app back-end using Node.js and express, with MySQL server as the database
- Created the front-end using React

Skills
